## Reset Button

In addition to the power on configurations described previously, the ZD-Series printer has a dedicated reset button located on the bottom of the printer which can be pressed with a paperclip or similar small object.

Pressing the button has the following results based on the length of the button press:

0-1 second	No action
1-5 seconds	<b>Printer reset</b> – Printer performs a factory reset and will automatically print a configuration label (and network label if present)
6-10 seconds	<b>Network reset</b> – Printer drops connection to the network, and a network factory default reset occurs. Upon completion of the reset, a configuration and network configuration label are automatically printed.
More than 10 seconds	<b>Exits the factory defaults function</b> without resetting the printer or making changes

Size of this preview:476 × 599 pixels.
