SA46 Unit Identification

There are several different interfaces used on the SA46 Stepper motor PSU drive enclosure from Smartdrive.

Contents

Comments

The unit used depends on the machine type, and they are not cross-compatible without rewiring. This TB should clarify which one is used on which machine – they are identified by the connection on the top.

Picture	Machine Type	Smartdrive Code	Part Code
	Ecoline	SA46/LD50	C0000192
	Router	SA46/V30	C0000175
	ZX	SA46/XD40	C0000280
